JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

14, 1912. The diagnosis was verified bacteriologically. The patient had lived at Bay City, Mich., during the past 19 years, and before that had lived in Cape Colony, South Africa, for about 7 years. Previous to his residence in Cape Colony he had lived in Russia. His father and an uncle are reported to have died of a peculiar skin disease, characterized by the loss of fingers and the mutilation of their noses. The patient is now quarantined in his own home in Bay City.

S. I., a Russian Jew, male, age 34 years, born in Courland, Russia, was found to have leprosy about May 17, 1912. The patient was known to have lived in and around Bay City, Mich., as a tramp junk dealer for about three years. At the time this case was reported to the State department of health the patient had broken quarantine and his whereabouts was unknown. However, about June 20 he returned to Bay City and was placed under quarantine by the city health department. On June 30 he again broke quarantine and was later apprehended in Buffalo, N. Y. He later escaped from detention in Buffalo and his present whereabouts is unknown.

PELLAGRA.

During the week ended August 10, 1912, pellagra was reported by city health authorities as follows: Columbus, Ga., 1 death; Lexington, Ky., 2 deaths; Lynchburg, Va., 1 death; Nashville, Tenn., 1 death; New Orleans, La., 1 death; Roanoke, Va., 1 death; Richmond, Va., 1 death.
